## Mentoring Programs

Great teachers help create great students. In fact, research shows that an inspiring and informed teacher is the most important school-related factor influencing student achievement, so it is critical to pay close attention to how we train and support both new and experienced educators. On-going **professional development** keeps teachers up-to-date on new research on how children learn, emerging technology tools for the classroom, new curriculum \ resources, and more.

Our students development is a goal which can be achieved collaboratively. The school features a system of **parent connect** which compliments home school communication and thus keeps parents involved in every activity of the school, by providing access to student information system. A sense of responsibility is thus created between parents and school about the students learning.
